

FEEL THE
DIFFERENCE

NIMBUS

PASSION AND LOVE FOR BOATING SINCE 1968.

It started in the early seventies when Volvo Penta needed a new kind of boat to suit their newly developed engine. An innovative group of people quickly seized the opportunity to create a new kind of boat for the social lifestyle. The Nimbus 26 was born and along with it a company that would become one of Europe's most renowned boat manufacturers. The company's history is a true success story - a tale of innovation, perfect timing and survival. But most of all a story about people who know about boats - and their passion and love for boating. A story still being told.

SCANDINAVIAN DESIGN

A holistic view in which functionality is central when designing a boat.

Why? Because we build boats for conscious people who want their boat to be as good as it can possibly be when used in its natural element.

A COMFORTABLE LIFE

Comfort is an important part of the Nimbus feeling, although this is not only about driving safely and comfortably in all weathers or about having plenty of room.

It includes every ingredient put into the boat, from design, production method, selection of materials and craftsmanship to delivery, service and accessibility – our ambition is to make boat ownership and life aboard as comfortable as possible.

ATTENTION TO DETAIL

Environment award winning, high-tech production facilities, vacuum infusion technology combined with a passionate team of boat builders with more than forty years of know-how who strive to achieve perfection in every detail. The result? Satisfied Nimbus owners who appreciate the quality of life experienced onboard.

AN IMPORTANT SIGN

Built to the highest standards and tested to optimize your experience at sea. Not only can you feel it, you have certified proof it's true. It may only be a small sign but it is issued by DNV-GL - The most highly renowned marine certification agency in the world. As you probably know already, all Nimbus boats are tested and certified by DNV-GL.
